## Four different optical systems

The two different optical systems - hybrid and lenticular - make it possible to obtain four different lighting effects: grazing light thanks to the grazing optic, soft and uniform on high, wide surfaces with the wall washer optic and more concentrated effects with flood and spot optics. A special Louvre grill accessory makes it possible to equip the different versions of Jedi Compact Indoor with an anti-glare system with longitudinal blades to control lateral emission and reduce the risk of glare.

### The Grazing optic versions

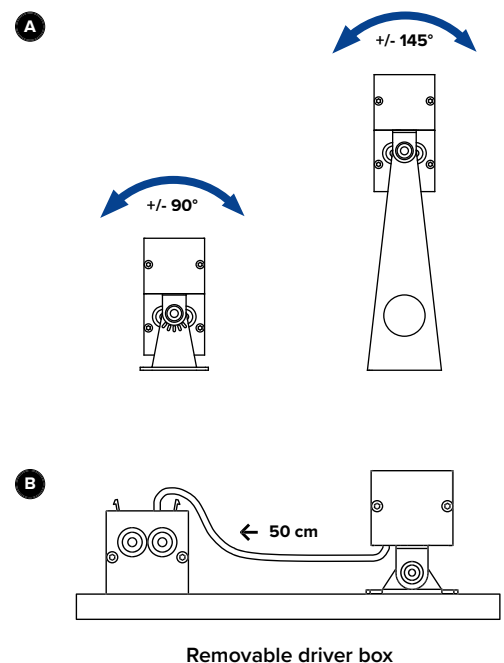

Is the most suitable solution for lighting vertical surfaces. Installed in continuous rows it makes it possible to obtain seamless uniform lighting.

#### A Wide rotation

If equipped with special brackets the projector can be adjusted up to  $\pm 145^\circ$ .

#### B Installation freedom with the removable driver

Removable driver of the 600, 900 and 1200mm versions can be hooked onto the fixture or placed next to it to better fit to thin frames or small grooves.
